

RESOLUTION GNRC 2012-03

**A RESOLUTION ADOPTING AND RECERTIFYING THE
COMPREHENSIVE ECONOMIC DEVELOPMENT STRATEGY FOR THE GREATER NASHVILLE REGION**

WHEREAS, the Comprehensive Economic Development Strategy (CEDS) for the Greater Nashville Region, with its Regional Capital Improvements Program (RCIP) focused on both short-term and long-term efforts in providing needed regional infrastructure projects in support of overall economic development, is one of GNRC's most important and effective regional planning tools; and

WHEREAS, the CEDS/RCIP was first prepared and adopted by the Council in 1971 and has since been periodically revised and updated to reflect changing regional growth trends, conditions, and needs; and

WHEREAS, in recent years the Overall Economic Development Program (OEDP) was redesignated as the Comprehensive Economic Development Strategy (CEDS) in conformance with Public Law 105-393, the EDA Reform act of 1998, a comprehensive amendment of the Public Works and Economic Development Act of 1965, as amended (PWEDA), and any reference herein to CEDS is also considered to include the previously approved OEDP; and

WHEREAS, current growth forecasts indicate that our 13-county region will grow by over 600,000 people to a total population of over 2.1 million by the year 2029; and

WHEREAS, to provide the regional job base required to accommodate expected population growth, total regional employment must increase from the total of over 1.1 million jobs today to over 1.6 million jobs by the year 2029 -- a needed increase of over 500,000 new jobs; and

WHEREAS, the updated CEDS/RCIP sets forth current growth trends, conditions, and needs, and economic development goals and strategies, which seek to achieve a consensus regional vision and to resolve identified needs and enhance overall economic development through the provision of essential regional infrastructure, support of new business and industrial development and expansion, and the creation of new jobs and private investment in the region; and

WHEREAS, these revised regional infrastructure needs and related economic development needs and strategies have been identified with broad based input in county level public meetings and other related meetings throughout the region including mayors and county executives, other local officials, local planners, chambers of commerce representing the area business community, utility districts, and interested citizens, and through regular meetings of the GNRC Executive Committee/Economic Development Strategy Committee.

NOW, THEREFORE, BE IT RESOLVED by the Council of the Greater Nashville Regional Council that this updated CEDS is hereby adopted by the Council; and,

BE IT FURTHER RESOLVED, that the CEDS/RCIP provides the Council and local, state and federal officials and agencies and citizens groups a tool for the planning and financing of identified projects and programs in order to fulfill the overall economic development goals and needs and regional vision reflected by member governments and other stakeholders of the Greater Nashville Region.

RESOLVED, this 29th day of September, 2011, the public health, safety, order, prosperity and general welfare of the citizens of this Region requiring it.

APPROVED AS TO FORM AND LEGALITY:

Sam H. Edwards
Executive Director/Chief Legal Counsel
Greater Nashville Regional Council

APPROVED:

Ken Wilber, President
Greater Nashville Regional Council

ATTEST:

Howard Bradley, Vice President
Greater Nashville Regional Council

**Comprehensive Economic
Development Strategy
& Regional Capital
Improvements Program**

September 2011

Prepared by:
Greater Nashville Regional Council
501 Union Street, Floor 6
Nashville, Tennessee 37219-1705

CHAPTER III

Regional Vision Statement, Public-Private Partnerships, Programs, and Activities, and Economic Development Strategies

The following regional planning and economic development goals, objectives, and policies of the Greater Nashville Regional Council reflect revisions and updates in view of the preceding evaluation of regional conditions, economic trends, growth impacts, needs and opportunities and other CEDS related elements. These goals and policies, as herein revised with the subsequently outlined regional economic development programs and projects formulated to assist in achieving the goals, were adopted by GNRC at the September 29, 2011 GNRC Full Board meeting to assist in guiding and accommodating overall regional growth and development and to help achieve the region's vision as defined below. The last full revision was completed by GNRC's CEDS Strategy Committee August 2007.

The Regional Visioning Project completed by the Cumberland Region Tomorrow (CRT) citizen's group in collaboration with GNRC, supplements and enhances the above stated vision for the region and following goals and development policies. The project solicited broadbased citizens' views across the region on how the region should grow over the next 20 years. The subsequent CRT Report to the Region which reflected project results was adopted in its entirety by GNRC for incorporation into GNRC regional growth and development goals and objectives.

Regional Vision Statement

To guide and accommodate the region's growth and continued economic development in the most effective, efficient and environmentally sound manner providing for the quality of life amenities, adequate public infrastructure, appropriate business development support, and educational and job training support to give the region a competitive edge in the global economy, and to insure a quality living and working environment and the availability of higher paying, diverse employment opportunities for all of the region's citizens.

The goals, objectives, and policies identify statements of purpose, desired results and specific guidelines for local governments and others to follow in implementing regional planning and economic development strategies aimed at achieving the regional vision, with state and federal support and assistance. The statements are intended to provide guidance for evaluating specific local and regional projects while allowing enough flexibility for each city and county to adapt projects to their individual needs and conditions.

The Report to the Region identified the following six (6) needs for regional quality growth. While they provide some duplications and mirror image of previously adopted GNRC development goals and objectives, they are stated fully here to be fully integrated into the GNRC CEDS and goals and development objectives as subsequently outlined:

Support economic development through regional quality growth, Help develop quality communities by preserving unique community character and heritage, Preserve critical open spaces, including farmland, forests, sensitive and biodiverse areas, habitats and strategic open lands, Support improvement of local and regional growth planning through improved transportation and land use planning, zoning and land use regulations to more effectively guide growth in the region, Encourage high quality development practices, and To help guide public and private infrastructure investments to promote quality growth and insure fiscal responsibility.

- **Public and Private Partnerships**

Regional Economic Development Programs, Efforts and Activities

Partnership 2010

Historically, those engaged in economic development in Nashville-Davidson County and other counties in the Greater Nashville Region and Middle Tennessee have enjoyed a close working relationship. Nashville had the regional and national identity and urban amenities needed to attract new companies. The other counties had land, water, labor and transportation access to satisfy a new company's desire to locate close to a metropolitan center. All benefited from a mutually rewarding relationship built over many years.

Partnership 2000 was structured as a \$6.0 million regional economic development program sponsored by the Nashville Area Chamber of Commerce and funded by hundreds of Middle Tennessee businesses. The program worked to build conditions for growth among business, government, and community leaders all over Middle Tennessee. Partnership 2000 included economic development leadership from throughout the Greater Nashville and South Central Tennessee Regions. These regional leaders served on a number of strategic planning committees, encouraging Partnership 2000 to keep a broad regional perspective.

Partnership 2000 developed a strategic plan to retain and expand existing business and employment, attract new investments, and work to improve the quality of life in the region.

Through Partnership 2010, the Nashville Chamber has strengthened its programs for recruiting new companies and helping existing businesses, especially small businesses. They have also marketed the region in a new national advertising campaign.

GNRC officials and staff have strongly supported Partnership 2000 and have served on several key planning committees in development of the strategic plan in the program's early years. Partnership 2000 celebrated 10 years of success, estimates by the Greater Nashville Area Chamber of Commerce indicate that the initiative has helped create nearly 195,000 new jobs in the region over the past decade. While Partnership 2000 was celebrating its many successes in marketing and recruitment activities for the region, the group also launched the beginning of the new 2010 campaign which will continue its long-term commitment to the economic growth of the metropolitan region.

Tennessee Economic Development Center

The Tennessee Economic Development Center houses offices of BellSouth's Economic Development Department and Tennessee's Department of Economic and Community Development. In the Center, these organizations pool their unique resources to attract new business opportunities to Tennessee. Those resources include: BellSouth's technology and infrastructure capabilities; Tennessee's marketing activities; Tennessee Tomorrow's initiatives for workforce development; and Tennessee Quality Award's promotion of quality standards for business success.

GNRC Regional Economic Development Programs, Resources and Technical Services

Earlier narratives described the overall purposes and responsibilities of the Greater Nashville Regional Council as the regional planning and economic development organization of the 13 counties and 52 cities of this region which comprise the Council's membership. This section further summarizes specific Council programs, resources and technical services focused on enhancing long-term regional economic development, new business development and retention, new job creation and new private investment. Efforts are on-going to assist overall regional growth in support of maintaining a viable regional economy. Priority areas of concern include development of plans and implementing cooperative arrangements for regional transportation, air and water quality, water and wastewater facilities and solid waste management. These efforts deal with resolving current and future needs, and assist in building essential regional infrastructure in support of economic development activity.

Cumberland Region Tomorrow (CRT) Regional Visioning Project: Several years ago Cumberland Region Tomorrow (CRT) initiated a Regional Visioning

Project in collaboration with GNRC. CRT is a private nonprofit citizens' group formed with assistance and support of Vanderbilt University. GNRC and various corporate and other supporters and participants throughout the region are providing funding support and related resources. CRT, with its Board of some 50 citizens of the region, launched its broad based citizens' visioning project to determine what kind of region the citizens want over the next 20 years and to determine the best ways to get there. Professional planning consultant assistance was retained by CRT to assist the efforts. Nine (9) of GNRC's counties are represented on the CRT Board and the four (4) more rural counties not represented on the Board may have representatives on the CRT Regional Technical Advisory Committee. This effort provides assistance for re-evaluating and setting the direction of GNRC updated long range goals, plans and development policies in the future. The project provides a 13 county GIS regional land use data base for GNRC, as well as, all related results of the regional visioning project. GNRC and CRT look forward to this collaboration as a long term and continuing commitment to help insure broad based regional consensus to more effectively deal with the future planning, growth and development needs of the Greater Nashville Region. The Toolbox for the region has been developed and presented to keep local community groups with the assistance of GNRC and others.

State Growth Planning Legislation Public Chapter 1101 / JECDS Boards:

GNRC and the state's other Development Districts have played a significant role in assisting cities and counties in implementing State Growth Planning Legislation, which requires each Tennessee county (except Metro's) to develop 20-year growth plans based on legislation adopted in 1998. GNRC and other Districts have worked in partnership with ECD Local Planning, Tennessee Advisory Commission on Intergovernmental Relations, Municipal Technical Advisory Service, County Technical Assistance Services and others in providing technical planning support services to cities and counties in the preparation and adoption of county growth plans under the Act.

All required growth plans by GNRC area counties have been completed, adopted locally and approved by the State. State approval is required as a prerequisite to continued eligibility by Tennessee cities and counties for a number of state and federal grant and loan programs administered at the state level.

Other GNRC Planning and Support Activities: GNRC also provides direct support to the shortline railroad authorities and the Nashville and Clarksville-Montgomery County MPOs for urban area transportation planning and project financing. The Council is also the Area Agency on Aging responsible for planning and financial management of area agency programs under the Tennessee Commission on Aging providing senior citizens center support, transportation, guardianship, nutrition and related programs to the more than 200,000 senior citizens of the region.

Drawing from all the above planning and program efforts, the preparation and maintenance of the GNRC Comprehensive Economic Development Strategy/Regional Capital Improvements Program has proven to be of substantial benefit as an aid in implementing the many functional area planning efforts of GNRC in the region. It has aided in implementing specific projects set forth in local, regional, and state development plans through obtaining essential financing, as well as in building consensus and cooperative arrangements that are often required. Funding support for this effort is just one of the ways Economic Development Administration planning grant funds are utilized to assist regional economic development efforts. However, doing all that is needed becomes increasingly difficult since the level of EDA funding support has not been increased in over 20 years. GNRC continues its on-going efforts to gain necessary funding support from all possible sources.

GNRC efforts in maintaining and updating the Comprehensive Economic Development Strategy and Regional Capital Improvements Program have been greatly enhanced by the state legislation passed in 1996 providing for supplemental funding to GNRC and other Tennessee Development Districts through and under direction of the Tennessee Advisory Commission on Intergovernmental Relations (TACIR) for annual updating of the regional public infrastructure needs inventory. This inventory provides the necessary database for updating the RCIP annually rather than every three or four years as in the past. From this work, TACIR also provides a detailed annual report to the Legislature and State Departments on a range of essential infrastructure needs for the entire State.

Technical Assistance Services

GNRC technical assistance services are focused on assisting member governments in dealing with a range of regional planning and development needs and issues. However, a number of staff members' time is dedicated to helping local governments obtain grants and low interest loan financing for community and regional infrastructure projects. Assistance includes help with area public meetings, project need determination, application packaging and submission, and upon approval, assistance in project financial management and administration. Their efforts are critical in helping implement local and regional plans, and in providing essential community infrastructure in support of overall growth and development. These efforts also include close working relationships with many state and federal agencies which provide needed financial resources such as the Tennessee Department of Economic and Community Development which administers the Federal Department of Housing and Urban Development (HUD) Community Development Block Grant Program (CDBG) for grants in housing rehab, neighborhood revitalization, water and sewer facilities, rural fire protection facilities and others. Other agencies include the Tennessee Housing Development Agency (THDA), Federal Rural Development Administration,

Tennessee Department of Environment and Conservation, Tennessee Department of Transportation, (TDOT) and others.

GNRC also has staff dedicated to assisting member governments and private industry in obtaining federal and state grants and lower interest loans for essential industrial infrastructure projects in support of new or expanding industries. This also involves working with a number of state and federal agencies providing financial resources for job creating economic development activities such as Tennessee Department of Economic and Community Development (ECD) under the CDBG Industrial Loan Program and the FastTrack Industrial Development Program (FIDP), the federal Economic Development Administration (EDA) for public works grants supporting industrial locations, TDOT, State Department of Environment and Conservation, and others.

Over the last 20 years or so, total infrastructure grants and loans for our 13 county region assisted by GNRC in building area community and industrial infrastructure have amounted to over \$100.0 million dollars. These efforts have assisted in creating thousands of new jobs in the region and have helped leverage hundreds of millions in new private investments.

Small Business Loans

GNRC direct small business loans are also provided through the Council's separate non-profit, Mid-Cumberland Area Development Corporation (MADC) which administers several small business loans in the Greater Nashville Region.

MADC is a Certified Development Corporation under the federal Small Business Administration (SBA) with a full board membership of 45 people representing all 13 counties. The 15 member MADC Board of Directors oversee direct operations of MADC, staffed by GNRC. The Board of Directors members include area bankers, local business and government representatives.

MADC packages and services loans under the SBA 504 Program. which offers small business borrowers up to 40 percent of needed capital in conjunction with at least 50 percent bank participation and 10 percent borrower participation. Loans on land and building are for up to 20 years on the SBA loan part derived from private debenture sales monthly, at interest rates near prime. In turn, the bank gets first lien on all the assets financed with MADC/SBA in a second lien position. MADC receives packaging and servicing fees to help defray administrative expenses. MADC also assists area banks, SBA, and borrowers in packaging loans under the SBA 7A Loan Guarantee Program.

MADC also administers the GNRC/EDA Revolving Loan Fund (RLF) which was established in the mid-1980s with EDA assistance. EDA has provided three capitalization grants for the RLF. Matching funds for these have been obtained from the CDBG program as well as the Tennessee State Growth Fund

administered by the Tennessee Department of Economic and Community Development. The RLF fund also includes capital from a low interest loan of \$1.0 million by MADC through the Rural Development Administration.

In administering these direct loan programs MADC and GNRC work closely with all area banks, SBA, EDA, Tennessee Rural Development Office, Tennessee Department of Economic and Community Development, the Area Minority Business Council, Area Small Business Development Centers and others.

Since its creation MADC's accumulative loans total \$110,895,250 dollars, As of June 30, 2010, these loans generated over \$195,397,533 dollars in new private investment and created over 5,903 new small business jobs in the region.

ADDITIONAL PARTNERSHIPS

A number of programs and activities for implementing GNRC regional economic development goals and objectives focuses on two major areas, both tied to several of the Council's current regional planning and economic development programs and services, and to its expertise as a regional economic development finance center. This includes assisting area small business in obtaining critically needed startup and expansion capital, and assisting area local governments in the planning and financing of projects in implementing the Regional Capital Improvements Program, a major element of the Comprehensive Economic Development Strategy. These are summarized in the following narrative.

GNRC Planning/Technical/Financial Assistance to Area Local Governments in Implementing Projects Under the Regional Capital Improvements Program

The GNRC Regional Capital Improvements Program (RCIP) is set forth in Appendix A of this report. As previously noted, the five-year RCIP identifies needed infrastructure projects by local government jurisdiction, estimated cost, location, and time of need for Fiscal Year 2007-2008 through Fiscal Year 2011-2012 under nine categories of public infrastructure need. The RCIP includes local and regional capital projects deemed essential for support of long-term regional economic development including housing, industrial site development, recreation facilities, solid waste management, transportation, water and wastewater, educational facilities, telecommunications, and other public facilities.

This recently updated RCIP includes 3,353 projects at an estimated total cost exceeding \$12.2 billion dollars.

The RCIP is an excellent regional planning and project financing tool, and has been of substantial benefit to area local governments and the region for a number of years. It helps local governments in planning and development coordination for meeting project needs which extend across city and county boundaries. It also serves as a valuable

project data base through which the Council assists member governments in identifying potential cost savings in joint project efforts and for use in pursuing needed project financing at the local level and through many state and federal grant and loan programs. GNRC compiles infrastructure needs data each year for member local governments and the Tennessee General Assembly under contract funding and guidance of the Tennessee Advisory Commission on Intergovernmental Relations.

GNRC assists area cities and counties in applying for, obtaining, and administering a number of state and federal grants (some loans) for RCIP project construction financing, including but not limited to the following:

- **Small Cities Community Development Block Grant (CDBG) Program** - - A federal Department of Housing and Urban Development program administered by the Tennessee Department of Economic and Community Development. Provides grants of up to \$750,000 for community infrastructure, serving low and moderate income areas including water and sewer facilities, housing rehabilitation, rural fire protection and others.
- **FastTrack Industrial Development Program (FIDP)** - - A state program administered by the Tennessee Department of Economic and Community Development. Provides grants of up to \$750,000 for communities to extend needed infrastructure to new or expanding industries including water and sewer facilities, rail spur lines, site improvement work and others.
- **Economic Development Administration (EDA)** - - A federal agency under the U.S. Department of Commerce which administers a number of grant programs aimed at creating new jobs and private investment. EDA provides an annual planning grant to GNRC in support of regional economic development planning and technical assistance, and planning grants to states and localities, as well as, matching capitalization grants for Revolving Loan Funds. One of EDA's more popular grant programs is for public works, through which communities can obtain up to 80 percent grants up to \$1.0 million to provide essential infrastructure to new or expanding industries including water and sewer facilities, industrial access roads, rail spur lines, and others. Eligibility and grant amounts are conditioned on the area's level of unemployment, per capita income and other measures of economic distress. EDA has also participated in industrial building grants to communities for sale via loan to a committed industry.
- **Rural Development Administration** - - A federal agency under the U.S. Department of Agriculture which administers a number of grant and loan programs focused on development and needed infrastructure in rural areas. Some of the more popular loan programs are for water and sewer facilities (some grants), rural rental housing/apartments, and single family housing, with some grants for housing rehabilitation, and the Intermediate Relending Program for small business loans.

- **Industrial Access Road Program** - - A state grant program administered by the Tennessee Department of Transportation. A negotiated grant amount toward construction of industrial access roads to serve committed new or expanding industries in public industrial park areas. Local governments must provide necessary rights-of-way and continuing maintenance on the completed roadway. Can be used in conjunction with EDA, CDBG, and other financing programs.
- **Tennessee Department of Environment and Conservation** - - A state agency that provides a number of grant and loan programs. Provides both state and federal funds for outdoor recreation projects on a 50-50 matching basis. Also provides water and sewer construction loans under a state loan pool, and sewer facility loans under a revolving loan fund financed through the federal Environmental Protection Agency (EPA). The agency also provides a range of grants for solid waste planning and facilities under the Tennessee Solid Waste Act of 1991, reauthorized in 1996. Also provides a limited amount of grant funds to regional agencies to support planning and problem solving efforts in water quality and non-point pollution problems.
- **Housing Development Grants and Loans** - - Several agencies provide a number of loans and some grants for a range of housing programs. The Tennessee Housing and Development Agency (THDA) provides low interest housing loans and housing rehabilitation grants, as does the federal Department of Housing and Urban Development (HUD), Emergency Home Repair, and the Rural Development Administration.

These programs, as well as many others, will continue to be utilized by area local governments in pursuing supplementary financing for construction of essential RCIP infrastructure projects in support of area economic development.

REGIONAL OBJECTIVES AND POLICIES

Housing

To promote and coordinate developments designed to provide all residents the opportunity to be adequately accommodated in safe, sanitary and comfortable housing served by adequate community facilities, accessible to employment and service centers.

Objective: To stabilize and preserve the area's existing housing stock and residential neighborhoods.

Policies:

- infrastructure improvements necessary to maintain residential areas should be given priority consideration in planning capital expenditures.

- codes inspection and enforcement programs designed to promote safe housing are to be established in all municipalities and counties.
- support community activities to establish neighborhood service associations aimed at housing maintenance projects.
- residential areas and buildings of historical significance are to be preserved and protected from conflicting land uses.
- energy audits and conservation methods are to be made available for older homes, particularly those owned by senior citizens or individuals on fixed incomes or with disabilities.

Objective: To reduce the involuntary concentrations of low-income persons, the elderly, those with disabilities, ethnic minorities, and other dependent on special facilities and services.

Policies:

- government sponsored low-income housing is to be dispersed throughout the region based upon the estimated service needs.
- private organizations sponsoring special care facilities are to be encouraged to locate the project apart from any existing concentration of similar facilities.
- adequate and affordable housing should be provided in all urban areas for low and moderate-income persons.

Objective: To discourage discrimination of all forms in housing construction, location, sales and rental.

Policies:

- vigorously enforce Fair Housing, Equal Opportunity and Americans with Disabilities Acts.

Objective: To foster the construction of new housing in areas already served or that can be readily served by community facilities, and that are convenient to employment centers, shopping facilities and transportation systems, are energy efficient, and are consistent with the local governments' growth plans.

Policies:

- major subdivision proposals are to be approved only in urban areas or within the urban growth boundaries and counties' planned growth areas so that existing infrastructure can be utilized or extended.
- developments emphasizing infilling should be given priority assistance from local governments.
- infrastructure improvements and construction for residential support will be restricted to existing urbanized areas and to areas within the cities urban growth boundaries and county's planned growth areas.

Air Quality

To establish and enforce policies that maintain and/or improve air quality at levels that are conducive to human health and a safe, attractive environment.

To improve the air quality in the Nashville area.

Objective: To reduce the amounts of suspended particulate, gaseous and odoriferous emissions particularly VOC.

Policies:

- all government facilities are to be properly equipped with required pollution control equipment to assure compliance with emission standards.
- testing and compliance of auto emissions are to be conducted in a coordinated and uniform manner.
- reduce emissions of VOC's from mobile, stationary (point), and area sources.

Objective: To develop and enforce local standards for regulating noise, vibration and lighting emissions.

Policies:

- municipal codes regulating emissions will be kept updated to reflect the most current standards.
- zoning and subdivision regulations are to be prepared so as to minimize noise, vibration and lighting emission impacts on residential areas.

Objective: To investigate and pursue alternative approaches to reducing pollutant emissions.

Policies:

- governments will review their own operations and encourage large employers to review their operations to establish staggered working hours.
- encourage the establishment and use of park and ride lots.
- encourage the use of high occupancy vehicles and alternative forms of transportation.
- encourage establishment and use of high occupancy vehicle lanes.
- encourage establishment and use of commuter and light rail.
- encourage establishment of bike and pedestrian facilities.

Objective: To improve the air quality through the use of facility siting, design and location.

Policies:

- industries with heavy emissions will not be concentrated in any single basin area.

- industries and buildings designed to use "clean" energy and have VOC emissions within the State guidelines are to receive special consideration and assistance for locating and constructing within the region.

Energy

To assist in and support the development of a regional, state and national strategy for energy production and use which will result in energy self-sufficiency, conservation and maintenance of the natural environment.

Objective: Increase energy conservation through prudent design and use of private and public facilities, and through careful application of land use and building controls.

Policies:

- utilization of geothermal system should be encouraged.
- solar rights and utilization of solar energy will be promoted and protected through zoning regulations and building codes.
- preservation and restoration of existing buildings is to be promoted as means of construction related energy savings.
- buildings using alternate energy sources will be encouraged and promoted through building codes and procedures which facilitate their construction.

Open Space And Recreation

To create a local and regional open space system that provides convenient outdoor recreational use by the public, conserves the natural resources, promotes the area's economic viability and guides the shape of urban growth.

To develop a broad range of recreational facilities and programs which promote the physical and mental health of the public and stimulates the use and advancement of the region's scientific, cultural, historical and archeological resources.

Objective: To preserve special designated areas, including flood plains, steep slopes, karst areas, natural or scenic vistas and agriculture-forestry areas from inappropriate development.

Policies:

- in accordance with local governments' growth plans high and moderate density urban developments are to be restricted from encroaching upon prime wildlife management areas, agricultural and forest lands.
- county and municipal zoning regulations will provide protection to environmentally sensitive and/or scenic areas from adverse development.
- flood plains are to be promoted for use as recreational areas.

- distinct natural or scenic vistas will be preserved for conservation/recreational area.

Objective: To provide adequate and varied recreation and open space opportunities throughout the region which reflect divergent cultural, economic and age characteristics.

Policies:

- periodic citizen surveys and updates of the Recreation and Open Space plan will be conducted to maintain current information on opportunities and needs.
- bike paths, jogging and walking trails and scenic trails and greenways should be developed Regionally and should be accessible by persons with disabilities.

VITAL PROJECTS

Economic Development

Achieve a viable, well-balanced economy throughout the region utilizing available natural and human resources to their fullest potential and in the most efficient and effective manner.

Objective: To increase the number of varied job opportunities throughout the region particularly in areas of high unemployment and/or low income. Maintain unemployment rates within the Region that are consistently below state and national averages. Maintain per capita and family income rates in the Region which exceed state averages.

Policies:

- new industrial/commercial sites are to be located consistent with the local government's growth plan and near appropriate employee markets.
- public capital improvements beneficial to new industrial/commercial facilities are to be emphasized in areas consistent with the local government's growth plan and of high unemployment and/or low income. Increase area business and industry recruitment efforts on high tech, high paying employers.

Objective: To increase economic diversification in the region by attracting new types of job opportunities.

Policies:

- job training opportunities will be increased to provide a more diverse skilled employee pool.
- part-time job opportunities for senior citizens will be encouraged through active community recruitment.

- active industry recruitment will center on bringing new types of businesses into the region and expanding existing businesses.

Objective: To increase and promote the recreation-tourism industry within the region.

Policies:

- public improvements supporting existing recreation-tourism areas or those necessary for the development of new areas will be given priority consideration for funding.
- local communities will develop tourist information and assistance programs promoting their area attractions.

Objective: To foster and facilitate the location of new business and industry within cities and within the cities' urban growth boundaries and the counties planned growth areas and the retention and expansion of existing business and industry.

Policies:

- Provide access to capital markets for start-up and expanding small business which provide economic diversity in the region through the GNRC Mid-Cumberland Area Development Corporation and its small business loan programs: SBA 504 Loans and Revolving Loan Fund Program
- Provide local governments access to infrastructure financing for business/industry location, expansion, and retention through State and Federal programs: FastTrack Industrial Development Program (FIDP), Community Development Block Grant Industrial Infrastructure Program, Economic Development Administration, and others.

Water Quality

To establish and support programs that will maintain and/or upgrade water quality at levels which will support aquatic life, wildlife and recreation, and are conducive to human health and a safe, attractive environment.

Objective: To eliminate discharges into waters that are in excess of Federal, state or local water quality standards.

Policies:

- industrial discharges will be regularly reviewed and analyzed for compliance with established standards.
- construction regulations will require developers to control site runoff during construction.
- producers of contaminated products must provide effective alternate treatment facilities if their wastewater cannot be adequately handled by public facilities.

- industrial wastewater treatment will be developed for material resource recovery whenever technologically and economically feasible.

Objective: Water quality will be improved through better control of non-point source pollution, resulting from better land use practices and conservation measures.

Policies:

- individual septic tank developments will be restricted from cities urban growth boundaries and counties planned growth areas and should be allowed in counties rural areas only in sites suitable for such disposal methods.
- developers will be required to control on-site runoff during construction.
- non-sanitary sewer development is to be prohibited upon major aquifers in the region.
- a landowner, builder or developer shall not change the natural course of runoff. Easements shall be provided for any open channel or storm sewer systems. All new building must be constructed at least one foot above the 100 year flood elevation.
- during the process of a major renovation any existing building that is now in the flood plain should be water-proofed or raised at least one foot above the 100 year flood elevation.
- side drainage ditches should only be permitted on streets without curb and gutter and curb and gutter streets should have storm sewer and the runoff carried by these storm sewers shall be properly treated before release into a waterway.
- storm sewers should be designed to carry 10 year storm and 100 year storm should be carried in the road right-of way.
- a new development should detain and treat any additional runoff generated by urbanization on site and release that runoff at the pre-development rate.
- low-flow channels in detention ponds should be paved. Any pond designed to detain runoff from a water shed of 250 acres or more should be dedicated to the City/County and publicly maintained.
- privately owned detention ponds shall be maintained by the owner. The pond shall discharge into a public storm sewer, drainage channel or stream.
- during construction a 25 foot undisturbed area must be maintained next to a creek or river.
- ditches or swales should be constructed to minimize erosion (sod, rip rap, gabions or paved ditch).
- a builder or developer should submit an Erosion Control Plan to the City-County prior to construction. A bond should be posted to insure compliance.
- areas disturbed during construction shall be seeded or sodded as soon as possible (maximum of 30 days)
- dirt or mud that is tracked onto a paved street by a developer or in the process of developing land should be removed daily by a scraper and weekly by a street sweeper provided by the developer.

- silt fence and hay bales may be used to control erosion and should be placed according to the Erosion Control Plan.
- the City/County should have the right to deny or revoke a building permit if the developer/builder does not conform with the Erosion Control Plan.
- subdivision and planned unit development regulations will require surface stormwater runoff retention.
- comprehensive soil erosion identification and prevention projects for both rural and urban areas are to be established and encouraged throughout the region.
- small stream containment dams are to be constructed to control the flow of stream pollution and to assist in storm water runoff control.

Objective: Alternate proposals for wastewater treatment in lieu of septic tanks and sewerage systems are to be explored and tested within the region.

Policies:

- alternate treatment proposals and experimental facilities will be encouraged.
- new technologies to reduce sanitary sewer and septic tank sewerage generation in residential and commercial establishments will be promoted.

REGIONAL SOLUTIONS SUGGESTED PROJECTS

Many of the regional programs and projects developed or supported by GNRC and other regional stakeholders are of a long-term nature, especially in the area of economic development. For example, it may take ten years or more for a planned highway to be constructed or certain areas to be served by water and sewer. Most of these are large, multijurisdictional, costly projects, which may require many years in completion. The key to implementing these needed improvements is long-range planning at both the local and regional level and requires well structured phased development. Major areas of economic development strategy essential to achieving the vision for the Greater Nashville Region are summarized in the following including those GNRC adopted from the Cumberland Region Tomorrow (CRT) Regional Visioning Project completed in collaboration with GNRC:

- 1) A very important aspect of regional economic development is **the continued improvement of education and job training in the Region**. GNRC strongly supports all levels of education as a means of improving the quality of life in the Region through a knowledgeable and highly trained labor force. The jobs of the future will require better education and training as well as a sound understanding of increasingly complex work tasks and procedures. Public and private school systems, technical institutes, community colleges, universities **and special job training** organizations and institutions all play a critically important role in the Region. GNRC will assist all local and state efforts and programs that will have a positive impact on education and job training activities.

- 2) GNRC will continue **to promote and support a regional commuter rail system**, as well as, related efforts to provide regional transit services aimed at reducing congestion and improving air quality such as expanded park and ride lots, regional bus service, regional van and carpooling services and related activities. Efficient, effective regional transit services are essential to the long term prosperity and economic development of the region.
- 3) Another important part of the long-range economic development strategy is the **continued support and growth of the tourism industry throughout the region**. Davidson County receives 29% of the tourism dollars spent in Tennessee and with the NFL Tennessee Titans playing in the Coliseum and the NHL Nashville Predators playing in the Gaylord Entertainment Center, these figures will hold. Several more recent downtown attractions such as the Country Music Hall of Fame and Museum, the Frist Center for the Arts and the Downtown Library also adds to the energy and opportunities for visitors and citizens. Each of these attractions has a restaurant and parking nearby or on site. Other projects under construction or planned include a new symphony hall, a Nashville Sounds baseball stadium to be built as part of a \$200 million mixed use development, an underground garage and park at the Metro Courthouse, a new Federal Courthouse and a substantial number and wide variety of downtown housing units. Other area cities and counties are also developing and promoting local attractions, events and historic places to draw tourists. The “Age Wave” discussed earlier should also prove beneficial in that these visitors tend to be more interested in history, unique events and experiencing culture in out of the way places. GNRC and other regional stakeholders will continue to assist local efforts and to promote the entire region as a place to visit through its strong support and participation in the Middle Tennessee Tourism Council and all of its members and partners.
- 4) **GNRC strongly supports the continued improvement and expansion of the Nashville International Airport** to serve more domestic and international locations to enhance tourism and other economic development opportunities for the region.
- 5) A GNRC Regional Greenways/Trails Planning Advisory Committee with two (2) representatives from each of the 13 counties completed a recommended **Regional Greenways/Trails System Plan** with broad-based regional input and consensus, with staff assistance by GNRC and the Nashville MPO. While providing for additional recreational and tourism opportunities, the regional greenways/trails system is also expected to provide regional interconnections for biking and hiking as alternate modes of transportation. The regional plan, as recommended, was adopted by the GNRC Board in 2004. Continue to promote and assist plan development.
- 6) The Council will also **strive to improve in-house capacity and capability in the organization's technical assistance services and other regional**

economic development finance services which are so important in assisting member governments in needed infrastructure planning, financing and development - - basic to long range plan implementation.

- 7) GNRC will continue to work with local, state and federal agencies to evaluate economic issues and trends and their potential impact on the Region. Cities and counties will be assisted in identifying and planning for future opportunities to upgrade or expand their economic base. These efforts will also be basic to the **continuing review, strengthening and periodic update of the Comprehensive Economic Development Strategy/Regional Capital Improvements Program** as regional conditions, trends, and needs change. Every effort will be made to prepare the Region for the changing global economy and the jobs of the 21st Century.

The provision of technical assistance to local governments in economic and community development activities has always been a major emphasis for GNRC and a number of other local, state and federal agencies and non profit organizations. To strengthen and further define this effort the agencies involved have instituted the **Greater Nashville Regional Development Team (RDT)**. GNRC will participate and serve as coordinator of the RDT whose mission is to improve the response to community and regional needs by working collaboratively, sharing information, providing assistance referrals and keeping other team members informed of new programs or services to local governments.

Chapter IV CEDS Goals and Solutions; CEDS Action Plan

This section also sets forth adopted strategies to assist implementation of regional goals and policies, GNRC adoption and incorporation of goals, strategies, and related findings from the CRT Regional Visioning Project Report developed in collaboration with GNRC, which also reflects and supports GNRC growth and development objectives and policies. The approved CEDS Action Plan is set forth and designed to produce near term progress and results toward the implementation of long-term strategy objectives. The CEDS Action Plan identifies and outlines priority projects and programs with a separate section establishing CEDS Performance Measures and an Annual Evaluation Process.

CEDS Action Plan (priority projects)

The CEDS Strategy Committee devised a strategic plan of action to realize the CEDS goals. These approved projects are tied to prioritized goals in the following list and submitted in each county for public notice and comment. Specific projects, programs and activities for implementing adopted goals and objectives are also set forth in the following.

CEDS GOALS

CEDS GOALS

The Comprehensive Economic Development Strategy Action Plan is set forth and designed to produce near term progress and results toward the implementation of long-term strategy objectives. The CEDS Action Plan identifies and outlines priority projects and programs with a separate section establishing CEDS Performance Measures and an Annual Evaluation Process.

CEDS Action Plan (priority projects)

The CEDS Strategy Committee devised a strategic plan of action to realize the CEDS goals. These approved projects are tied to prioritized goals in the following list and submitted in each county for public notice and comment. Specific projects, programs, and activities for implementing adopted goals and objectives are also set forth in the following.

CEDS Goal 1

Update Regional Development Strategy that will provide the region with a comprehensive approach toward multiple areas of planning and development.

- update last regional development strategy from the 1970's
- ensure real-time information
- Establish proactive regional polices that enhance strengths to maintain sustainability
- facilitate responsible and sustainable development
- provide regional leadership and planning with effective development tool

Plan of Action:

- a. The communities will be divided in to three sub-regions to ensure that each phase addresses the following;
- b. Conduct extensive research to update and expand upon previous strategy
- c. Develop public – private partnerships to ensure maximum participation
- d. Examine current trends and concepts and update all relevant data to be used to formulate the development of a preliminary plan
- e. Outline development needs required for growth
- f. Conduct research to ensure sustainability and address regional needs in the following areas; Regional Capital Improvements, Environmental; Air and Water Quality Standards, Residential, Commercial, Industrial, Open and Scenic Spaces, Food Deserts, Agrarian and Forestry, Education
- g. Survey counties and local communities for input
- h. Make staff available to communities who require technical assistance on state, county, and municipal policy levels
- i. Identify and Target on best practices, which ensure consideration of the most effective methods for the region and empower communities to address regional objectives
- j. Reference County Growth Plans, local economic development strategies, and other locally-adopted planning and development documents
- k. Strongly support and assist in the creation of a regional mass transit system.

Draft and Design preliminary plan:

- Secure feedback from public – private to ensure maximum participation
- Secure state support toward the creation of laws and regulations that facilitate success of implementation strategies
- Work with each community and their partners in the region to forward adaptation of polices that will strengthen and develop successful strategies
- Upon completion of phase three, the components will be combined to formulate a working regional plan

Cost: \$150,000 (per phase) Will be in 3 phases

Public-Private Partnerships: EDA, GNRC, TNECD, TDEC, TACIR, Local Planning offices, MPO, RPO, TN General Assembly, 53 municipalities, and 13 counties.

Measurements:

- Annual
- Establish and monitor milestones
- Increase in participation
- Monitor implementation of strategies that address; Zoning, Subdivision Regulations, Codes Enforcement, Water and Sewer Extension Polices, Annexation Considerations, Community Facilities Planning, Capital Improvements
- Industrial Development Association Reports

CEDS Goal 2

Expand pedestrian, bicycle trails, and other forms of multi-modal transportation to meet demand and increasing populations.

- Increase viable alternatives for transportation.
- Improve the health and quality of life in region by providing localized access to physical fitness activities while reducing health care costs
- Increase safety on streets and provide safe environment for walkers
- Reduce dependency on cars as a form of transportation and create increases in bicycle and walking as viable modes of transportation
- Preserve the natural and scenic environment of the region.
- Provide safe connecting routes between residential and business districts.
- Promote coordination and cooperation among local governments.
- Expand recreational resources and facilities across the region by providing on- and off-road hiking and biking trails.
- Support and participate in regional initiatives to plan and implement multiple modes of transportation where feasible
- Provide regional assistance toward other multi-modal transportation efforts.

Project: Research and design regional pedestrian trail and bicycle lanes plan to meet rapidly growing demand.

Plan of Action:

- a. Utilize the TN Department of Transportation Bicycle and Pedestrian Element of the State Long Range Transportation Plan as a baseline for local and regional pedestrian and bicycle planning
- b. Utilize the Nashville Area MPO's Bicycle and Pedestrian Study findings as a guide for the MPO counties, and for applicability to the entire GNRC Region
- c. Establish public – private partnerships
- d. Determine needs in each county via surveys and public hearings
- e. Research best practices and models successful in similar communities
- f. Work with communities to increase the capacity of safe biking lanes and pedestrian paths where they are appropriate in and around schools, population centers, high density commuting routes, as well as parks
- g. Identify funding streams to facilitate improvements and provide technical assistance to communities
- h. Assist communities in promoting safe bicycling practices and on courtesy among drivers, cyclists, and pedestrians
- i. Assist communities in the development of education plans designed to increase public participation

Cost: \$215,000 (3 years)

Public-Private Partnerships: EDA, GNRC, TDOT, MPO, RPO, TDEC, Local hospitals, TN Dept of Health, Area Chambers of Commerce, 13 counties, and 53 municipalities throughout region.

Measurements:

- Annual
- Increases in milestone intervals representative of the plan of action
- Increases in community efforts regionally toward plan execution
- Participation in communities
- Monitor increases in walking trails/paths and bicycle lanes

CEDS Goal 3

Provide sewer and water to underserved and unserved areas of the region to promote economic development and serve commercial needs that facilitate job growth.

GNRC has been very active in efforts to secure support for existing and expanding area businesses. This project has sought to increase the capacity to support underserved and unserved areas that would increase quality of water/sewer services.

Plan of Action:

- a. Develop strategies that improve infrastructure capacity and address needs that accommodate/facilitate business growth that will provide job development and accommodate housing demand.
- b. Develop Public-Private partnerships to provide funding for innovative water/sewer systems.
- c. Provide water/sewer services to unserved industrial areas with high demand for development.

Project: Barton's Creek sewer expansion and extension to serve Permobil expansion development on 840 which will create 100 new high wage jobs for the region.

Cost: \$2,000,000

Public-Private Partnerships: EDA, USDA-RD, Permobil, TN dept of ECD; FastTrack, 4 Lake Regional Industrial Development Authority, Towns of Lebanon, Hartsville, as well as Trousdale, Macon, and Wilson Counties.

Measurement:

- Annual
- Monitor payroll taxes
- Reporting forms
- New business permits
- Monthly unemployment listings
- Industrial Development Association Reports

CEDS Goal 4

Develop infrastructure to meet escalating demand for regional convention center.

- Increase capacity of regional large-scale hospitality sites that will increase tourism and tax revenues across region
- Provide for the establishment of a high-capacity convention center
- Collaborative research and development with chambers of commerce, TN ECD, County and Local ECD personnel across region
- Foster Public-Private partnerships that support hospitality and convention capacity
- Provide for 3,000 new jobs across region
- Provide for \$700 million in initial economic development

Plan of Action:

- a. Expand Public/Private partnerships that will introduce innovations designed stimulate additional growth in tourism, convention, and hospitality fields
- b. Provide for the only high-capacity convention interest in region/state
- c. Increase related regional job opportunities with competitive salaries

Project: **Provide for infrastructure capacity to support regional convention center**

Cost: \$700,000,000

Public-Private Partnerships: Economic Development Agency, TN department of ECD, THEC, all local and county ECD departments, Labor and Workforce Investment, Tennessee State University, Belmont University, Vanderbilt University and Greater Nashville Region County and Municipal Mayors, Nashville Areas Chamber of Commerce.

Measurement:

- Annual
- Industrial Development reports
- Monthly employment reports
- New business development
- Monitor volume of use and increased groups

CEDS Goal 5

Establish region as alternative energy industrial center

- decrease dependence on traditional energy and petroleum based sources
- increase availability of alternative energy resources throughout the region
- increase regional consumer knowledge on alternative energy
- increase regional utilization of alternative energy sources

Plan of Action:

- a. Creation of 1000 specialized high technological employment opportunities
- b. Provide for the highest capacity solar manufacturing facility in the South
- c. Increase related regional job opportunities with competitive salaries

Project:

Provide for infrastructure capacity (regional airport expansion and upgrades, increase capacity of water/sewer, and paving) to serve Hemlock Semiconductor Corporation

Private Investment: \$ 3,000,000,000

Cost: \$2,500,000

Public-Private Partnerships: Hemlock Semiconductor Corporation, Economic Development Agency, TN department of ECD, THEC, all local and county ECD departments, Labor and Workforce Investment, Austin Peay State University, University of Tennessee, Tennessee State University, Belmont University, Vanderbilt University and Greater Nashville Region County and Municipal Mayors, Nashville Areas Chamber of Commerce.

Measurement:

- Annual
- Monthly employment reports
- New business development
- Monitor increases in solar power

CEDS Goal 6

Develop industry specific facilities, specialized in high technology fields to meet escalating demand.

- Secure regional development high-tech/nanotechnology business development
- Establish high-tech incubator to encourage entrepreneurial activities
- Collaborative research & development with technological breakthroughs with applications to human health, energy, defense, homeland security, agriculture, & environmental sciences
- Foster Public-Private partnerships that support local school systems
- Increase regional salaries

Plan of Action:

- a. Expand Tennessee Board of Regents/Private partnerships with innovative industries that promote research and development at the college level.
- b. Secure high-technology industries that cultivate student interest in region and commitment to remain in area (reduce brain drain).
- c. Increase related regional job opportunities with competitive salaries.

Project: RSP building with specialized high-tech infrastructure to support; info-, nano-, bio-technology, wireless communications, optical communications, & learning sciences development center at Tennessee State University.

Cost: \$5,500,000

Public-Private Partnerships: Economic Development Agency, Tennessee Board of Regents, THEC, Economic & Community Development, Labor & Workforce Investment Agency, Community Development Block Grants, Tennessee Valley Authority, Tennessee State University, Penn State, Massachusetts institute of Technology, Georgia Tech, University of Georgia, US Army Research Office, NASA, US Naval Laboratory, Tennessee Technology Development Corp, USDA, Department of Homeland Security, Department of Defense, Marriott Corp, GA, NC, KY, NV, Nashville Area Chamber of Commerce, Dell, IBM, and each surrounding county.

Measurement: Annual

- Industrial Development reports
- TSU graduate employment reports
- New business development

CEDS Goal 7

Advance economic growth in region through development of high-tech & sector specific businesses

Develop entrepreneurial campus that connects entrepreneurs with the training and resources they need in order to incubate their innovations and advance economic growth in the Middle Tennessee Region.

- Assist locally driven ventures per Partnership 2010
- Establish business support system for entrepreneurs, students, & veterans
- Increase consistency in existing business services
- Increase coordination between universities and regional employers
- Increase job creation

Plan of Action:

- a. Provide for a facility to house 72 business incubators
- b. Create an open studio to train mentors to support rising entrepreneurs in an open, collaborative work environment
- c. Conduct four-day industry-specific competitive conferences
- d. Conduct social and informational events to foster relationships
- e. Create resource lab for incubators to meet technical assistance needs

Project: Transform existing buildings into a single location campus

Cost: \$3,000,000

Public-Private Partnerships: Economic Development Agency, Tennessee Board of Regents, THEC, Economic & Community Development, Labor & Workforce Investment Agency, FDIP, Tennessee Valley Authority, Tennessee State University, Penn State, Massachusetts institute of Technology, Belmont University, Vanderbilt University, US Army Research Office, NASA, US Naval Laboratory, Tennessee Technology Development Corp, USDA, Regional Chambers of Commerce, City of Nashville, and each surrounding county.

Measurement: Annual

- Industrial Development reports
- Regional employment reports
- Track matriculated business success

CEDS Goal 8

Regional disaster mitigation to facilitate economic recovery

Develop &/or execute plans which ultimately provide for economic development, diminishing disaster impact upon regional economy.

- Stimulate or create private investment
- Stimulate or create new job creation
- Provide for rebranding of impacted sectors
- Retain existing jobs & industry
- Mitigate against future disasters

Plan of Action:

Proactively seek out & execute projects that will not only negate impact of past disasters but potential future disasters

Project Examples;

Cheatham County Industrial Park Waste Water Treatment Plant
810 jobs retained EDA Grant \$843,000 Match \$211,000
South Broadway Strategic Economic Development Plan
EDA Grant \$320,000
Connexion Americas Business Incubator Build out
EDA Grant \$1,000,000 Match \$200,000
Tennessee Technology Center Program Expansion
EDA Grant \$1,699,000 Match \$340,000
Pathways Revolving Loan Fund
EDA Grant \$7,500,000 Match \$7,500,000
Nashville Convention & Visitors Bureau Post-Flood Super-Sector Rebranding
EDA Grant \$2,500,000 Match \$1,500,000
Nashville Music City Center Peabody Substation
EDA Grant \$3,300,000

Cost: See project examples

Public-Private Partnerships: Various State, Federal, County, & Local governments would participate in partnership with businesses, industries, & not-for-profits

Measurement:

Monthly, Quarterly, & Annually
New job creation
New business development
Unemployment reports
Industrial development reports

CEDS Goal 9

Provide sewer and water to underserved and unserved areas of the region to promote economic development and serve commercial needs that facilitate job growth.

GNRC has been very active in efforts to secure support for existing and expanding area businesses. This project has sought to increase the capacity to support underserved and unserved areas that would increase quality of water/sewer services.

Plan of Action:

- a. Develop strategies that improve infrastructure capacity and address needs that accommodate/facilitate business growth that will provide job development.
- b. Develop Public-Private partnerships to provide funding for innovative water/sewer systems.
- c. Provide water/sewer services to unserved industrial areas with high demand for development.

Project: Red River Preserve sewer expansion and extension to serve Cheatham County/Robertson County collaborative Red River Preserve Technology Park.

Cost: \$3,000,000

Public-Private Partnerships: EDA, GNRC, USDA-RD, TN dept of ECD; FastTrack, Cheatham County, Robertson County, Ashland City, the City of Springfield, Industrial Development Boards, Connect Cheatham, & local Chambers of Commerce.

Measurement:

- Annual
- Monitor payroll taxes
- Reporting forms
- New business permits
- Monthly unemployment listings
- Industrial Development Association Reports

CEDS Goal 10

Advance economic growth in region through development of high-tech & sector specific businesses

Develop entrepreneurial campus that connects entrepreneurs with the training and resources they need in order to incubate their innovations and advance economic growth in the Greater Nashville Region.

- Assist locally driven ventures per Partnership 2010
- Establish business support system for entrepreneurs, students, & veterans
- Increase consistency in existing business services
- Increase coordination between universities and regional employers
- Increase job creation

Plan of Action:

- a. Provide for a facility to house regional business incubators
- b. Create an open studio to train mentors to support rising entrepreneurs in an open, collaborative work environment
- c. Conduct four-day industry-specific competitive conferences
- d. Conduct social and informational events to foster relationships
- e. Create resource lab for incubators to meet technical assistance needs

Project: Regional EDA & TN ECD INCITE collaborative regional business incubator

Cost: \$1,000,000

Public-Private Partnerships: Economic Development Agency, Tennessee Board of Regents, THEC, Economic & Community Development; INCITE Program, Labor & Workforce Investment Agency, FDIP, Tennessee Valley Authority, Tennessee State University, Penn State, Massachusetts institute of Technology, Belmont University, Vanderbilt University, US Army Research Office, NASA, US Naval Laboratory, Tennessee Technology Development Corp, USDA, Regional Chambers of Commerce, Stewart, Montgomery, Robertson, Sumner, Houston, Cheatham, Davidson, Wilson, Trousdale, Humphreys, Rutherford and Williamson counties.

Measurement: Annual

Industrial Development reports
Regional employment reports
Track matriculated business success

CEDS Goal 11

Develop infrastructure to meet escalating demand for Medical Trade Center.

- Increase capacity of regional sectors that will increase tourism and tax revenues across region
- Provide for the establishment of a health care focused convention center
- Collaborative research and development with chambers of commerce, TN ECD, County and Local ECD personnel across region
- Foster Public-Private partnerships that support hospitality and convention capacity
- Provide new jobs across region
- Provide 300 million in initial economic development

Plan of Action:

- a. Expand Public/Private partnerships
- b. Provide for the only health care related convention interest in Southeastern US
- c. Increase related regional job opportunities with competitive salaries

Project: Provide for infrastructure capacity to support Nashville Medical Trade Center

Cost: \$300,000,000

Public-Private Partnerships: Economic Development Agency, TN department of ECD, THEC, all local and county ECD departments, Labor and Workforce Investment, Tennessee State University, Belmont University, Vanderbilt University and Greater Nashville Region County and Municipal Mayors, Nashville Areas Chamber of Commerce.

Measurement:

- Annual
- Bookings
- Monthly employment reports
- New business development
- Monitor volume of use and increased groups
